

Tarik Haddadi

Senior Full-Stack Software Engineer | AI SaaS Platform Architect

Luxembourg | Work permit | t.thaddadi@gmail.com | +352 691 237 229 | English - French - Arabic
Senior engineer with 10+ years of experience delivering enterprise web, mobile and SaaS platforms across finance, regulation, construction, telecom, retail, transport and AI. Strong focus on full-stack architecture, secure multi-tenant systems, AI workflow orchestration, observability, CI/CD, cloud/on-prem deployment and production-grade engineering practices.

TARGET PROFILE

Full-Stack Software Engineer / SaaS Engineer / AI Platform Engineer / Technical Lead roles focused on scalable platforms, AI-enabled products and enterprise-grade cloud/on-prem systems.

SELECTED PLATFORM WORK

Founder & Architect - Flexit AI Workflow / SaaS Platform

2024 - Present

Independent product | Luxembourg

- Designed an enterprise-oriented AI workflow platform combining workflow automation, conversational agents, internal knowledge/RAG, file processing, marketplace-style reusable apps and runtime sessions.
- Implemented secure multi-tenant architecture with tenant isolation, RBAC, plans/capabilities, quotas, API key scopes, audit logs, encrypted secrets and configurable runtime policies.
- Built backend services with NestJS, TypeScript, TypeORM, PostgreSQL, Redis and BullMQ, including execution queues, worker lanes, retries, timeout handling, artifact storage, WebSocket/polling realtime and usage metering.
- Added observability with Prometheus/Grafana dashboards, OpenTelemetry/Jaeger traces, backend health checks, queue metrics, execution analytics, token consumption by user/tenant/workflow and AI cost estimation.
- Worked on cloud/private-cloud/on-prem readiness with Docker, Kubernetes, Helm overlays, Keycloak/OIDC, SMTP, KMS/BYOC direction, Stripe subscriptions, licensing and admin back-office configuration.
- Established release hardening practices: CI/CD, CodeQL, security scans, frontend build budgets, obfuscated builds, technical documentation, audit checklists and validation matrices.

PROFESSIONAL EXPERIENCE

Senior Consultant - Full-Stack / Frontend Architect

Apr 2024 - Present

Proximus / Codit | Bertrange, Luxembourg

- Frontend lead and architecture contributor on enterprise GenAI / SaaS initiatives, defining application structure, technical standards, CI/CD and documentation.
- Delivered full-stack development and architecture across React, Angular, NestJS, Node.js, Python, Docker, Kubernetes, Azure, SQL, GraphQL and accessibility/security best practices.
- Implemented and supported SSO/OIDC/OAuth flows, Keycloak integrations, Google/Microsoft/Facebook auth, Jira API integrations and cloud/on-prem AI deployments.
- Led technical workshops, RFP analysis, project scoping, audits, estimations and solution proposals for clients in construction, regulation, finance, retail, transport and AI.
- Worked with Azure Functions, Logic Apps, Web Apps, databases, Key Vault, GCP App Engine/Cloud Build and automated deployment pipelines.

Technical Expert

Nov 2021 - Apr 2024

Neopixl SA - Smile Group | Differdange, Luxembourg

- Provided technical leadership, audits, workshops, team support and architecture guidance across web and mobile projects.
- Built and maintained Angular, React, React Native and NestJS applications with Redis, PostgreSQL, TypeORM, Docker, SSO and automated CI/CD.
- Delivered projects for telecom, transport, construction, insurance, mobility, IoT and white-label platforms, including app store deployments and production maintenance.
- Applied OWASP, WCAG, performance optimization, monthly upgrades, peer reviews and code quality practices across client projects.

Technical Lead

Nov 2016 - Nov 2021

Smile Group Morocco | Casablanca, Morocco

- Led frontend teams, task dispatching, peer reviews, technical support and knowledge-sharing sessions.
- Delivered Angular, JavaScript, HTML/CSS, jQuery, Webpack and CMS integrations for OCP, EY Morocco, Orange Morocco, ONCF and Bank Al-Maghrib.
- Contributed to technical architecture, documentation, audits and Jenkins-based CI/CD for enterprise web platforms.

Web Developer / Freelancer

2014 - 2016

Instrumar, Macompex & Freelance | Morocco

- Developed web applications, frontend websites, CMS integrations, custom mobile apps, maps, charts, WebGL and PHP/Slim backend features.
- Managed deployment, domain configuration, UI redesigns and customer-facing production fixes.

TECHNICAL SKILLS

Frontend: React, Angular, Vue, TypeScript, NGRX, Redux, Vite, Storybook, WCAG, SEO, responsive UI, PWA.

Backend: NestJS, Node.js, Express, Python, REST APIs, GraphQL, Webhooks, TypeORM, Swagger/OpenAPI.

Data & Queues: PostgreSQL, MySQL, MongoDB, Redis, BullMQ, pgvector, caching, connection pooling, backups.

AI: OpenAI, Anthropic, Mistral, Ollama, OpenRouter, LangChain, RAG/GraphRAG, agents, embeddings, OCR, LLM integrations.

Cloud/DevOps: Docker, Kubernetes, Helm, Azure, GCP, GitHub Actions, GitLab CI, Azure DevOps, NGINX, TLS, domains.

Security: Keycloak, OAuth2, OIDC, JWT, RBAC, API key scopes, KMS/BYOC concepts, encryption, OWASP, CSP, CORS.

Observability/Quality: Prometheus, Grafana, Jaeger, OpenTelemetry, Sentry, P95/P99, CodeQL, SonarQube, Trivy/Gitleaks, obfuscation.

EDUCATION & CERTIFICATIONS

Master WMR - Web, Multimedia & Networks | Universite Bretagne Sud, France | 2015-2016

Master - IT Engineering | IGA Rabat | 2015-2016

Licence - Computer Systems Engineering | IGA El Jadida | 2012-2013

Azure Fundamentals AZ-900 | Microsoft / Proximus | 2024

Microsoft MTA certifications: HTML5 Application Development, Cloud, Networking, Windows Server Administration, Databases, Windows OS.
