

Tarik Haddadi

Senior Full Stack Software Engineer | AI Platform Architect

Luxembourg-based engineer focused on enterprise SaaS, AI workflow automation, multi-tenant platforms, secure runtime architecture, observability and cloud/on-prem deployments. I build products that combine frontend quality, backend reliability, AI orchestration and production-grade infrastructure.

WHAT I BUILD

Enterprise AI Automation Platforms Workflow orchestration, conversational AI, document processing, knowledge search, agents, reusable workflow apps and business automation systems.	Multi-Tenant SaaS Architecture Tenant isolation, roles, plans, quotas, admin center, billing gates, white-label readiness and customer-controlled platform configuration.
Secure Runtime & Identity Keycloak, OIDC, OAuth2, JWT, RBAC, API keys/scopes, KMS/BYOC thinking, encrypted secrets, SSRF guards, OWASP and CSP.	Cloud-Native Operations Docker, Kubernetes, Helm, Redis/BullMQ worker lanes, horizontal/vertical scaling, ingress, probes, CI/CD and production-shaped local environments.

KEY ACHIEVEMENTS

- **10+ years** delivering software across Luxembourg, Morocco and European enterprise contexts.
- **Enterprise SaaS architect** with hands-on experience in product architecture, runtime design, DevOps and client workshops.
- **AI platform builder** covering agents, RAG/GraphRAG, model providers, token usage, workflow generation and document automation.
- **Production mindset**: monitoring, P95/P99, Grafana, Prometheus, Jaeger, OpenTelemetry, security gates, CodeQL and CI/CD.

TECHNICAL STACK

Angular	React	TypeScript	NestJS	Node.js
TypeORM	PostgreSQL	Redis	BullMQ	Docker
Kubernetes	Helm	Azure	GCP	OpenAI
Anthropic	Mistral	Ollama	OpenRouter	Keycloak
OIDC	OAuth2	JWT	RBAC	KMS/BYOC
Grafana	Prometheus	Jaeger	OpenTelemetry	CodeQL
SonarQube	OWASP			

SELECTED PROJECTS

Flexit - Enterprise AI Automation Platform

Designed and built a multi-tenant AI automation platform combining workflow orchestration, conversational agents, RAG/GraphRAG, file processing, marketplace-style reusable apps, admin center, billing, licensing, observability and Kubernetes deployment flexibility.

Stack: AI Agents | Workflow Runtime | GraphRAG | NestJS | React/Angular | PostgreSQL | BullMQ | Kubernetes

GenAI SaaS Platform - Proximus / Codit

Frontend lead and architecture work on enterprise GenAI SaaS initiatives, including UI architecture, CI/CD, documentation, AI integrations, workshops and production-grade delivery practices.

Stack: GenAI | SaaS | Frontend Architecture | CI/CD | Azure

CSSF - GenAI Platform V1

Contributed to frontend architecture, CI/CD and documentation for a regulated environment requiring strong delivery structure, security awareness and technical governance.

Stack: Regulated sector | Frontend | CI/CD | Documentation

LuxTrust - Secure AI / Jira Integration

RFP analysis, architecture proposal, workshops to define needs and secure feature perimeter, plus Jira API integration with AI-related processes.

Stack: Financial | RFP | Jira API | Security perimeter

Cargolux - Operational PoC

Architecture proposal and PoC exploration for operational platform patterns close to warehouse and logistics management use cases.

Stack: Air Cargo | PoC | Architecture | Operations

Construction Daily Reports Platform

Full-stack SaaS-style implementation for daily reports, field workflows, dashboards, validation flows, Azure deployment and operational reporting.

Stack: React | Azure | MySQL | PWA | Operations

EXPERIENCE TIMELINE

2024 - Present	Senior Consultant - Proximus / Codit, Luxembourg Frontend lead and full-stack consultant on enterprise SaaS, GenAI, Azure, CI/CD, architecture, technical audits, workshops, SSO/OIDC, AI integrations and production delivery.
2021 - 2024	Technical Expert - Neopixl / Smile Group, Luxembourg Technical architecture, team support, audits, workshops, web and mobile delivery, React Native, Angular, NestJS, Redis, PostgreSQL, Docker, CI/CD and enterprise customer projects.
2016 - 2021	Technical Lead - Smile Group Maroc Frontend team leadership, code review, project delivery, technical documentation, CI/CD, enterprise websites and applications for industry, transport, banking and telecom clients.
2014 - 2016	Web Developer / Freelancer - Morocco Frontend development, CMS integration, custom web and mobile applications, JavaScript, PHP/Slim, deployment, customer support and early product delivery experience.

EDUCATION & CERTIFICATIONS

- Master WMR - Web, Multimedia & Networks - Universite Bretagne Sud
- Master - I.T Engineering - IGA Rabat
- License - Engineering Computer Systems - IGA El Jadida
- Azure Fundamentals AZ-900 - Proximus & Microsoft
- Microsoft MTA certifications: HTML5, Cloud, Networking, Windows Server, Databases and OS fundamentals

CONTACT

Open to senior full-stack, platform engineering, AI SaaS, technical lead and solutions architecture opportunities. Let us discuss AI platforms, enterprise software, architecture and automation.
